

# CUSTOM SOLUTIONS

POWERED BY BRIDGERA IOT

The Internet of Things (IoT), which integrates physical objects with internet software, is being called the fourth industrial revolution and has the potential to transform business and operational process, customer experience and client engagement. The limiting factor may be imagination or more likely access to a technically diverse development team.

Bridgera IoT for Custom Solutions is the perfect complement to a great idea. We design a unique solution around your unique business needs, without the need to build a software development competency. Give yourself a competitive advantage, bring us your great idea and we will build you a great solution.

**Bridgera IoT is software-as-a-service for connecting devices, processing data, and enabling unique applications. A white-labeled solution developed to spec and supported for life, providing the flexibility of DIY without the risk or cost of hiring software developers.**

Connect Devices

Process Data

Enable Applications

## START WITH BRIDGERA IOT

For a sturdy foundation, *Bridgera IoT* comes loaded with the fundamentals:

- A subscription service on a fault-tolerant platform
- Connect any device with push and pull interaction
- Adapt to any network protocol
- Aggregate and process data in real time at any scale
- Collect and maintain data at any volume or variety
- Push notifications through email, SMS, or a dashboard
- Cloud hosted with 24x7 help desk and security controls

## LEVERAGE OFF-THE-SHELF IOT CAPABILITIES

*Bridgera IoT* has a portfolio of IoT capability ready for deployment:

- Find/Track location indoors and outdoors
- Establish geofences
- Monitor velocity and acceleration
- Device provisioning and remote diagnostics
- Emergency alerts
- Report sensor readings

## BUILT TO SPEC ENTERPRISE SOLUTIONS

It is impossible to thrive with 'off the shelf' technologies. An *Asset Monitoring* solution can be built to your specification atop *Bridgera IoT* within two to four months:

- Custom processing rules enabled for each use case
- Custom APIs for enterprise integration and alternative data feeds
- Custom analytics, reports, and dynamic dashboarding capabilities
- Custom role based portals for user, admin, and operations with mobile and web access

## ONGOING SUPPORT AND INNOVATION

As a business evolves, so does its challenges. Bridgera stays engaged after implementation to host, support, and maintain the solution. But more importantly, Bridgera will provide value added development support to evolve the IoT solution as you identify new use cases and devices for continuous improvement of your operations. All without the need for internal software developers.
